SUPERSEDED EVIDENCE

Early 41% full-index figure

replaced by

Early Delta timing figures

replaced by hardened gate

Affinity-pinned A00/A01 timing invalid operational effect sizes

ACCEPTED RELEASE WORK

Parallel memory-adaptive SA

Parallel bounded SAindex and junctions

Full / Overlay / Delta insertion

Integrity, atomic publication, deployment gates

H01 affinity recovery accepted in blackstar.2

A02 adaptive input chunks accepted in blackstar.2

A05 NUMA-aware private loading accepted in blackstar.2

A06 transcript recursion copies accepted in blackstar.2

Q01 cumulative qualification blackstar.2 release gate

ARCHIVED EXPERIMENTS

Threaded BAM compression not release-ready

alignReadsMulti resource semantics incomplete

REJECTED

Persistent prefork workers measured slower

libdeflate replacement measured slower

A01 touched-bin reset excluded; effect size invalidated

A02b producer / consumer queue post-A02 wait below one worker-equivalent

A09 LTO and PGO exact outputs; about 1.2% gain each below practical gate
