GitHub fork protected master blackstar.1 and .2
Export GitHub metadata release assets + PR and CI evidence
Remote mirror + all-ref bundle SHA-256 manifest
Two local restore drills exact reference inventories
Git history is recoverable; fork-network membership is not
Explicit owner approval for permanent detachment?
No
ABORT fork remains unchanged
Yes
GitHub Leave fork network irreversible boundary
Verify standalone identity isFork false + exact refs
Rename master to main restore strict protection
Restore releases, Pages, labels, Issues, Discussions, security and repository metadata
External pipeline adoption requires separate authorization
INDEPENDENT SUCCESSOR upstream lineage preserved BlackSTAR owns maintenance
