BlackSTAR release candidate
Build identity fork version + OpenMP + checksum
Focused ASan / UBSan tests
Alignment runtime gates ordinary + bound affinity private + shared genome raw + zcat + canonical BAM
Format path
v1 unchanged
Overlay / Delta
Byte identity against oracle
Mapping, junction, and count equivalence
Adversarial malformed-package rejection
Randomized paired full-size benchmark
Canary, fallback, and rollback
EXCLUDED EXPERIMENTS alignReadsMulti persistent prefork workers threaded BAM compression
not release capability
QUALIFIED RELEASE BOUNDARY
