A01 experiment: sparse reset
Begin next read
Restore only bins recorded by the previous read
Build and merge alignment windows
Slot was empty?
Yes
No
Record bin and strand once
Preserve overwrite semantics
Qualified release: reset every read
Begin next read
Clear every slot in both window-bin arrays
Build and merge alignment windows
Write the bins used by this read
Experiment boundary
EXCLUDED Correctness passed performance effect invalidated
Preserved: window IDs, merge order, scoring, output, and thread ownership
