Issue, proposal, security report, or experiment
Origin and change class
Inherited
BlackSTAR
Security
Upstream-origin behavior
Regression or feature
Private advisory path
Focused pull request tests + compatibility impact
Required CI GCC + Clang + CodeQL sanitizers + deterministic tests
Performance-sensitive?
No
Yes
Pinned matched control order-balanced pairs correctness + resource gates
Maintainer decision
Protected main linear history
Exact release candidate two reproducible builds
STAR + archive + checksums build metadata + SPDX SBOM provenance
Prior release + canary remain the rollback boundary
Repository release is not external deployment authorization
Immutable vMAJOR.MINOR.PATCH release and acceptance record
